What is BeagleBone Black Wireless?. Replacing the 10/100 Ethernet port with onboard 802.11 b/g/n 2.4GHz WiFi and Bluetooth, the popular open source BeagleBone Black computer now comes with built-in wireless networking capability. Leveraging a partnership with Octavo Systems and designed in CadSoft Eagle, BeagleBone Black Wireless is the easiest to use and modify credit-card sized IoT ...

BeagleBoard.org - black-wireless

The BeagleBone Black is the newest member of the BeagleBoard family. It is a lower-cost, high-expansion focused BeagleBoard using a low cost Sitara XAM3359AZCZ100 Cortex A8 ARM processor from Texas Instruments. It is similar to the Beaglebone, but with some features removed and some features added ...

Beagleboard:BeagleBoneBlack - eLinux.org

This page collects information about BeagleBoard.org's range of BeagleBone boards based on the TI Sitara AM335x, an application processor SoC containing an ARM Cortex-A8 core. The range currently consists of the original BeagleBone and the upgraded but lower cost BeagleBone Black.. Most features are common to the two models. The differences between them are described in each section under a ...

BeagleBone Community - eLinux.org

This post provides supplementary information to the video that I have just posted on using GPIOs with the Beaglebone Black.

This is the companion site for the book "Exploring BeagleBone: Tools and Techniques for Building with Embedded Linux" by Derek Molloy. The site structures and contains all of the digital media that is

described in the book. Each chapter in the book links to an individual web page, which can be accessed using the menu on the top right-hand side of this page when you close this menu. For ...

Exploring BeagleBone â€“ Chapter 13: Real-Time BeagleBone

The two PDF documents listed in this video are available below (P8 and P9 Headers): Press on the image and then press â€œview rawâ€• to view the PDF files.

Beaglebone: GPIO Programming on ARM Embedded Linux

Power Supplies and Cables. Problem. Novice Raspberry Pi users will often find themselves tearing their hair out over a Raspberry Pi board that reboots, or behaves erratically, for no apparent reason, even when using a 5VDC power supply that is able to provide sufficient current, according to the board specifications.

Raspberry Pi Power Issues - Nordic Group

The system consists of three main parts. The Gateway, the energy nodes, and an android application interface. Figure 1 below shows how these parts all interact with each other.

Smart Home Energy Monitoring & Management System

LCD (Liquid Crystal Display) screen is an electronic display module and find a wide range of applications. A 16x2 LCD display is very basic module and is very commonly used in various devices and circuits.

Comparison of single-board computers - Wikipedia

Our 2017 New Year's guide to hacker-friendly single board computers turned up 90 boards, ranging from powerful media playing rigs to power-sipping IoT platforms.

Ringin' in 2017 with 90 hacker-friendly single board computers

FreeBSD is a free and open-source Unix-like operating system descended from Research Unix via the Berkeley Software Distribution (BSD). FreeBSD is a direct descendant of BSD, which was historically called "BSD Unix" or "Berkeley Unix" (in violation of the UNIX trademark). The first version of FreeBSD was released in 1993, and as of 2005 FreeBSD was the most widely used open-source BSD operating ...

FreeBSD - Wikipedia

Introduction. This page provides the steps to build the Processor SDK and individual components from source. The Processor SDK build is based on the Arago Project which provides a set of layers for OpenEmbedded and the Yocto Project targeting TI platforms.. This page will provide the basic steps require to recreate the Processor SDK along with a reference of Processor SDK specific ...

Processor SDK Building The SDK - Texas Instruments Wiki

First in the market DSD volume can be bit perfect controlled directly using WIN/MAC/LINUX system volume mixer with our customized firmware. No need to annoying manual switch ASIO output everytime for PCM to/from DSD playback in foobar2000 as using the other famous USB I2S module. New isolated DAC PCB option.
