Deposit of Biological Materials in Support of a U.S

A composite material (also called a composition material or shortened to composite, which is the common name) is a material made from two or more constituent materials with significantly different physical or chemical properties that, when combined, produce a material with characteristics different from the individual components. The individual components remain separate and distinct within ...

In the health and agricultural sciences, biological materials were once freely and widely exchanged. But more and more, these materials have gained commercial value. Public sector institutions, as well as private companies, have recognized, therefore, that proprietary protection of these materials may be necessary. Material transfer agreements (MTAs) are legal instruments that define terms for ...

Martindale's Calculators On-Line Center: Materials

An electrolytic capacitor (abbreviated e-cap) is a polarized capacitor whose anode or positive plate is made of a metal that forms an insulating oxide layer through anodization. This oxide layer acts as the dielectric of the capacitor. A solid, liquid, or gel electrolyte covers the surface of this oxide layer, serving as the or negative plate of the capacitor.
