Health physics is the applied physics of radiation protection for health and health care purposes. It is the science concerned with the recognition, evaluation, and control of health hazards to permit the safe use and application of ionizing radiation. Health physics professionals promote excellence in the science and practice of radiation protection and safety.

One of the biggest concerns in radiology in recent years is the safety of gadolinium-based contrast agents (GBCAs) used in magnetic resonance imaging (MRI). Radiologists and patients began to question the safety of gadolinium a few years ago when a study came out in late 2014 showing the agent is deposited and retained in the brain.[1]
