The leadâ€“acid battery was invented in 1859 by French physicist Gaston PlantÃ© and is the oldest type of rechargeable battery. Despite having a very low energy-to-weight ratio and a low energy-to-volume ratio, its ability to supply high surge currents means that the cells have a relatively large power-to-weight ratio. These features, along with their low cost, make them attractive for use in ...

The flying change is a lead change performed by a horse in which the lead changes at the canter while in the air between two strides. It is often seen in dressage, where the horse may do several changes in sequence (tempi changes), in reining as part of the pattern, or in jumping events, where a horse will change lead as it changes direction on the course.
