Computational fluid dynamics (CFD) is a branch of fluid mechanics that uses numerical analysis and data structures to analyze and solve problems that involve fluid flows. Computers are used to perform the calculations required to simulate the free-stream flow of the fluid, and the interaction of the fluid (liquids and gases) with surfaces defined by boundary conditions.

Computational fluid dynamics - Wikipedia

Physics and engineering. Dynamics (mechanics) Aerodynamics, the study of the motion of air; Analytical dynamics, the motion of bodies as induced by external forces; Brownian dynamics, the occurrence of Langevin dynamics in the motion of particles in solution; File dynamics, stochastic motion of particles in a channel; Flight dynamics, the science of aircraft and spacecraft design

Dynamics - Wikipedia

The atmosphere is a carrier on which some natural and anthropogenic organic and inorganic chemicals are transported, and the wet and dry deposition events are the most important processes that remove those chemicals, depositing it on soil and water. A wide variety of different collectors were tested to evaluate site-specificity, seasonality and daily variability of settleable particle ...

Nonlinear Dynamics provides a forum for the rapid publication of original research in the developing field of nonlinear dynamics. The scope of the journal encompasses all nonlinear dynamic phenomena associated with mechanical, structural, civil, aeronautical, ocean, electrical and control systems.

Nonlinear Dynamics "incl. option to publish open access

Systems Simulation: The Shortest Route to Applications. This site features information about discrete event system modeling and simulation. It includes discussions on descriptive simulation modeling, programming commands, techniques for sensitivity estimation, optimization and goal-seeking by simulation, and what-if analysis.

Multibody System Dynamics provides a unique single vehicle for reporting significant developments in all areas of multibody system dynamics. The journal explores theoretical and computational methods in rigid and flexible multibody systems, their applications, and experimental procedures used to validate the theoretical foundations.

Engineering Mechanics: Dynamics Effect of Altitude on Gravitation $\hat{=}$ Force of gravitational attraction of the earth on a body depends on the position of the body relative to the earth $\hat{=}$ Assuming the earth to be a perfect homogeneous sphere, a mass of 1 kg would be attracted to the earth by a force of: $\hat{=}$ 9.825 N if the mass is on the surface of the earth $\hat{=}$ 9.822 N if the mass is at an ...

Engineering Mechanics: Dynamics Dynamics

The mode choice decision for a given trip is affected by various attributes associated with different modes such as travelling cost, egress and access travel time, in-vehicle travelling time, public transport accessibility levels, unobserved preference for the mode as well as individual characteristics like income & age (Wen and Koppelman, 2001, Zahavi, 1974, Ashiabor et al., 2007, Scheiner ...
