Outcome Metrics: Measuring What Matters in the Nonprofit World

Source lines of code (SLOC), also known as lines of code (LOC), is a software metric used to measure the size of a computer program by counting the number of lines in the text of the program's source code. SLOC is typically used to predict the amount of effort that will be required to develop a program, as well as to estimate programming productivity or maintainability once the software is ...

If you had to pick one single metric to measure procurement, what would it be? Most procurement organizations look at cost savings as a percentage of spend. It's a classic measure of normalized spend management effectiveness on a single (but critical) variable called cost. But, since we must serve ...

Procurement ROI Is The Single Best Procurement Metric

Decimal time is the representation of the time of day using units which are decimally related. This term is often used specifically to refer to the time system used in France for a few years beginning in 1792 during the French Revolution, which divided the day into 10 decimal hours, each decimal hour into 100 decimal minutes and each decimal minute into 100 decimal seconds, as opposed to the ...
