Assessment of Millimeter-Wave and Terahertz Technology for Detection and Identification of Concealed Explosives and Weapons. Washington, DC: The National Academies Press. doi: 10.17226/11826. ... Click here to buy this book in print or download it as a free PDF, ...

### **Assessment of Millimeter-Wave and Terahertz Technology for**

Download a PDF of "Assessment of Millimeter-Wave and Terahertz Technology for Detection and Identification of Concealed Explosives and Weapons" by the National Research Council for free.

### **Assessment of Millimeter-Wave and Terahertz Technology for**

He is currently working as a Postdoctoral Associate in Massachusetts Institute of Technology (MIT). He was a Research Fellow in NTU from 2014 to 2017. His research interests include radio frequency (RF),

millimetre-wave (mm-wave), and Terahertz frequency synthesizers and transceiver systems. AWARDS

### **Publications - MIT Terahertz Integrated Electronics**

It lies between the super high frequency band, and the far infrared band, the lower part of which is also referred to as the terahertz gap. Radio waves in this band have wavelengths from ten to one millimetre, so it is also called the millimetre band and radiation in this band is called millimetre waves, sometimes abbreviated MMW or mmW.

### **Extremely high frequency - Wikipedia**

The Journal of Infrared, Millimeter, and Terahertz Waves offers a peer-reviewed platform for the rapid dissemination of original, high-quality research in the frequency window from 30 GHz to 30 THz. The topics covered include: sources, detectors, and other devices; systems, spectroscopy, sensing, interaction between electromagnetic waves and matter, applications, metrology, and communications.

networks. To enable this, millimeter wave systems operating in the EHF band (30–300GHz) have been heavily investigated in the recent years [4]. Furthermore, several groups are already exploring the use of even higher frequency windows available in the Terahertz band (THF, 0.3–3THz), e.g., 300GHz, 640GHz, or even the entire THz window [5 ...

### **IEEE TRANSACTIONS ON WIRELESS COMMUNICATIONS, VOL. 16, NO**

Millimeter Wave and Terahertz Frequency Bands Ian F. Akyildiz, Fellow, IEEE, Chong Han, Member, IEEE, and Shuai Nie, Student Member, IEEE Abstract—In the millimeter wave (30-300 GHz) and Terahertz (0.1-10 THz) frequency bands, high spreading loss and molecular absorption often limit the signal transmission distance and coverage range.
