Multiprocessor System-on-Chip (MPSoC) Technology. Wayne Wolf, Fellow, IEEE, Ahmed Amine Jerraya, and Grant Martin, Senior Member, IEEE. Abstractâ€”The multiprocessor system-on-chip (MPSoC) uses multiple CPUs along with other hardware subsystems to implement a system. A wide range of MPSoC architectures have been developed over the past decade.

With the increase in the number of cores embedded on a chip; The main challenge for Multiprocessor System-on-Chip (MPSoC) platforms is the interconnection between that massive number of cores.

This paper addresses this type of problem by proposing a design flow supporting the system-level design of heterogeneous multiprocessor system-on-chip (MP-SoC), by extracting information from the ...

(PDF) Metrics for multiprocessor system on chip

A multiprocessor system-on-chip (MPSoC) [Wol08B] is a system-on-chip with multiple processing elements. We use the term distributed system, in contrast, for a multiprocessor in which the processing elements are physically separated. In general, the networks used for MPSoCs will be fast and provide lower-latency communication between the processing elements.

multi-processor system-on-chip - an overview

The multiprocessor system-on-chip (MPSoC) is a system-on-a-chip (SoC) which uses multiple processors (see multi-core), usually targeted for embedded applications. It is used by platforms that contain multiple, usually heterogeneous, processing elements with specific functionalities reflecting the need of the expected application domain,...

Multi-processor system-on-chip - Wikipedia

A multiprocessor systems-on-chip (MPSoC) is a system-on-chip (SoC) that contains multiple instruction-set processors (CPUs). The fact that an MPSoC is a multiprocessor means that software design is an inherent part of the overall chip design.

Abstract—Recently, the increase of the transistor density in Multiprocessor system-on-chips (MPSoCs) and the constant rise of the operating frequency of the processor result in high on-chip temperature. The stability and reliability of MPSoCs inevitably have been seriously affected.
