

nato missile defense for pdf

The United States missile defense complex in Poland, also called the European Interceptor Site (EIS), was a planned American missile defense base. It was intended to contain 10 silo-based interceptors: two-stage versions of the existing three-stage Ground-Based Interceptors with Exoatmospheric Kill Vehicles that had a closing speed of about 7 km/s. The first planned complex was to be located ...

United States missile defense complex in Poland - Wikipedia

National missile defense (NMD) is a generic term for a type of missile defense intended to shield an entire country against incoming missiles, such as intercontinental ballistic missile (ICBMs) or other ballistic missiles.
