network reliability in practice pdf

High availability (HA) is a characteristic of a system, which aims to ensure an agreed level of operational performance, usually uptime, for a higher than normal period.. Modernization has resulted in an increased reliance on these systems. For example, hospitals and data centers require high availability of their systems to perform routine daily activities.

It is hard to believe we finished "Digital Habitat: Stewarding technology for communities" back in 2009. 7 years later the book is still selling on Amazon (amazing! grateful!). Etienne Wenger, John D. Smith and I wrote the book to help you support your communities. Now we have a little solstice, holiday, year end present for you.

An artificial neural network is a network of simple elements called artificial neurons, which receive input, change their internal state (activation) according to that input, and produce output depending on the input and activation.. An artificial neuron mimics the working of a biophysical neuron with inputs and outputs, but is not a biological neuron model.
