

nucleic acids and molecular pdf

"Molecular Structure of Nucleic Acids: A Structure for Deoxyribose Nucleic Acid" was the first article published to describe the discovery of the double helix structure of DNA, using X-ray diffraction and the mathematics of a helix transform. It was published by Francis Crick and James D. Watson in the scientific journal Nature on pages 737–738 of its 171st volume (dated 25 April 1953).

Molecular Structure of Nucleic Acids: A Structure for

<http://www.nature.com/nature/dna50/watsoncrick.pdf>

Nucleic acids, macromolecules made out of units called nucleotides, come in two naturally occurring varieties: deoxyribonucleic acid (DNA) and ribonucleic acid (RNA). DNA is the genetic material found in living organisms, all the way from single-celled bacteria to multicellular mammals like you and me.

Nucleic acids (article) | Khan Academy

Nucleic acid structure refers to the structure of nucleic acids such as DNA and RNA. Chemically speaking, DNA and RNA are very similar. Nucleic acid structure is often divided into four different levels: primary, secondary, tertiary and quaternary.

Nucleic acid structure - Wikipedia

1. Introduction. G-quadruplexes (G4s) are non-canonical nucleic acids secondary structures [1, 2] that form in guanine (G)-rich DNA and RNA sequences when Gs arrange into stacked planar quartets coordinated by Hoogsteen-type hydrogen bonds and stabilized by metal cations such as K^+ and Na^+ [3]. In the human genome, G4s have been reported to play key regulatory [5,6] and pathological roles [7,8].

Surface Plasmon Resonance kinetic analysis of the

Application Ethidium bromide (EtBr) is the most commonly used nucleic acid stain for PAGE or agarose gel electrophoresis. The fluorescence of EtBr increases 21-fold upon binding to double-stranded RNA and 25-fold on binding double-stranded DNA so that destaining the background is not necessary with a low stain concentration (10 μ g/ml).

Ethidium bromide solution BioReagent, for molecular

3D Organoid Culture: New In Vitro Models of Development and Disease. Model systems drive biological research by recapitulating body processes and functions from the molecular to whole organism level.

Journal of Nucleic Acids - Hindawi Publishing Corporation

3DNA is a versatile, integrated software system for the analysis, rebuilding, and visualization of three-dimensional nucleic-acid-containing structures.

3DNA Homepage -- Nucleic Acid Structures

Biochemistry is the study of chemical processes within and relating to living organisms. By controlling information flow through biochemical signaling and the flow of chemical energy through metabolism,

biochemical processes give rise to the complexity of life.
