Waste Land is a 2010 British-Brazilian documentary film directed by Lucy Walker. The film chronicles artist Vik Muniz, who travels to the world's largest landfill, Jardim Gramacho outside Rio de Janeiro, to collaborate with a lively group of catadores of recyclable materials, who find a way to the most prestigious auction house in London via the surprising transformation of refuse into ...

Share on Twitter; Share on Facebook; Share on Google+; The average American tosses 4.4 pounds of trash every single day. It may not seem all that astonishing on the surface, but with 323.7 million people living in the United States, that is roughly 728,000 tons of daily garbage â€“ enough to fill 63,000 garbage trucks.. That is 22 billion plastic bottles every year.

E-waste or electronic waste is created when an electronic product is discarded after the end of its useful life. The rapid expansion of technology means that a very large amount of e-waste is created every minute.. Electronic waste or e-waste may be defined as discarded computers, office electronic equipment, entertainment device electronics, mobile phones, television sets, and refrigerators.
