The uranium market, like all commodity markets, has a history of volatility, moving not only with the standard forces of supply and demand, but also to whims of geopolitics. It has also evolved particularities of its own in response to the unique nature and use of this material. Historically, uranium has been mined in countries willing to export, including Australia and Canada.

Uranium market - Wikipedia

A third world country is defined as,. A Third World country is a country whose views are not aligned with NATO and capitalism or the Soviet Union and communism. The use of the term "Third World" started during the Cold War and was used to identify which of three categories the countries of the world aligned with.

Q&A: genetically modified food - World Health Organization

Desalination, like other major industrial processes, has environmental impacts that must be understood and mitigated. A new report from the Pacific Institute examines effects on the marine environment associated with the construction and long-term operation of seawater desalination plants, including withdrawing water from the ocean and discharging the highly concentrated brine.
