Science in a broad sense existed before the modern era and in many historical civilizations. Modern science is distinct in its approach and successful in its results, so it now defines what science is in the strictest sense of the term. Science in its original sense was a word for a type of knowledge, rather than a specialized word for the pursuit of such knowledge. In particular, it was the ...

Biophysics is an interdisciplinary science that applies approaches and methods traditionally used in physics to study biological phenomena. Biophysics covers all scales of biological organization, from molecular to organismic and populations. Biophysical research shares significant overlap with biochemistry, molecular biology, physical chemistry, physiology, nanotechnology, bioengineering ...

Public Involvement in Health Research â€™ call for papers for an international symposium University of Sydney, February 21 2019. Knowledge from lived experience, â€™consumersâ€™™, â€™patientsâ€™™ and â€™publicsâ€™™ is becoming increasingly part of not just the results of research in health but of the creation and interpretation of health research.

Abstract. Emotions are often felt in the body, and somatosensory feedback has been proposed to trigger conscious emotional experiences. Here we reveal maps of bodily sensations associated with different

emotions using a unique topographical self-report method.
