Romi Moondi is a Canadian writer who converted her blog "Year of the Chick" into novel form, and followed that with two more books in the series (and a prequel short story!). The most recent of these novels takes place in Paris, where she lived for six months in 2013 (after trading in her corporate job for an inspiration-seeking mission).

The baby chick has feathers and claws on its toes. The baby chick will be born soon because it is getting too big and running out of food. The chick begins to hatch when it breaks into its air cell and takes its first breath. The chick uses its egg tooth to help break out of the egg. The wet chick will soon dry and have fluffy soft feathers.

The risk of complications from varicella varies with age. Complications are infrequent among healthy children. They occur much more frequently in persons older than 15 years of age and infants younger than 1 year of age. Prior to the introduction of varicella vaccination, the fatality rates for varicella were approximately 1 per 100,000 cases among
